ByDesign Biology for grades 9–12

NEW! The *ByDesign Biology* textbook is uniquely written covering a wide range of essential biology topics giving teachers and students insight into ecosystems, cell structure and function, genetics, and human biology. The program is inquiry based which is essential to science learning. Scripture connections to the Bible have been included when appropriate. Clear diagrams, beautiful images, various extensions, and numerous activities are featured throughout the program.

The **Student Edition** is a hybrid (print and eBook).

The **Teacher Edition** Resource includes: Teacher Edition eBook, Teacher Lab Resources, Student Lab Resources, chapter PowerPoint presentations, customized assessments, and an assessment test generator.

**The print Teacher Edition desk copy is sold separately. Printed lab manuals are available by request for the Teacher Lab Resources and the Student Lab Resources.*

NEW! Daily Lesson Guide eBooks

The new lessons found in each unit provide rigorous academic quality and align with the Standards of Proficiency in Literacy. Note that the Daily Lesson Guide is self contained providing the necessary resources that you need to teach a theme and unit of study.

Daily Lesson Guide eBook includes:

- User friendly eReader features with easy access to complete digital text and detailed table of contents navigation.
- Pop-up definitions to core curriculum standards.
- Navigation from planning pages to actual weekly and daily lessons.
- Links to blackline masters and printables to support the weekly lessons.

The **Teacher Manual** is an Essential Component providing the information necessary for building a strong literacy program by including:

- A philosophy of teaching and learning in English languages arts.
- A comprehensive program scope and sequence.
- A variety of ready-to-use classroom resources.
- Detailed instructional strategies, reference charts, research-based assessments.
